SEARCHING INSTRUCTIONS

Names upon cards from which this index was printed were verified for the first sixteen columns. Any errors which occurred in surnames and christian names were partly due to inability of punch clerks to correctly decipher handwriting. When a name does not appear in its proper place in the index, an additional search of the index should be made and if a record which should have been filed is not located, reference should be made to the original certificates according to the number arrangement below. It is, of course, possible that a certificate received late will be found among groups for later months. Late certificates precede those for the principal month of occurrence.
